

# Hopex API

 **Type:** Self-Paced eLearning  **Level:** Advanced  **Duration:** 3 Hours

 **Prerequisites:** Strong working knowledge of Hopex

## COURSE INFORMATION

Hopex offers access to a wide range of APIs to compute and exchange information. In this module, you will explore the computation APIs and the GraphQL communication system that are available in Hopex and comprehend their potentialities.

## LEARNING GOALS

At the end of this course, you will:

- Differentiate the use of APIs in various programming languages.
- Use basic and advanced functions.
- Define GraphQL.
- Build and execute GraphQL queries.
- Generate Reports and diagrams.
